

**BRENNIX**

**LIFT** *OFF*

---

**MANUAL**  
ANLEITUNG

# USAGE

**Make sure that a suitable surface is used for the stand. Do not use the device near flammable objects and read the instructions for use and safety information carefully.**

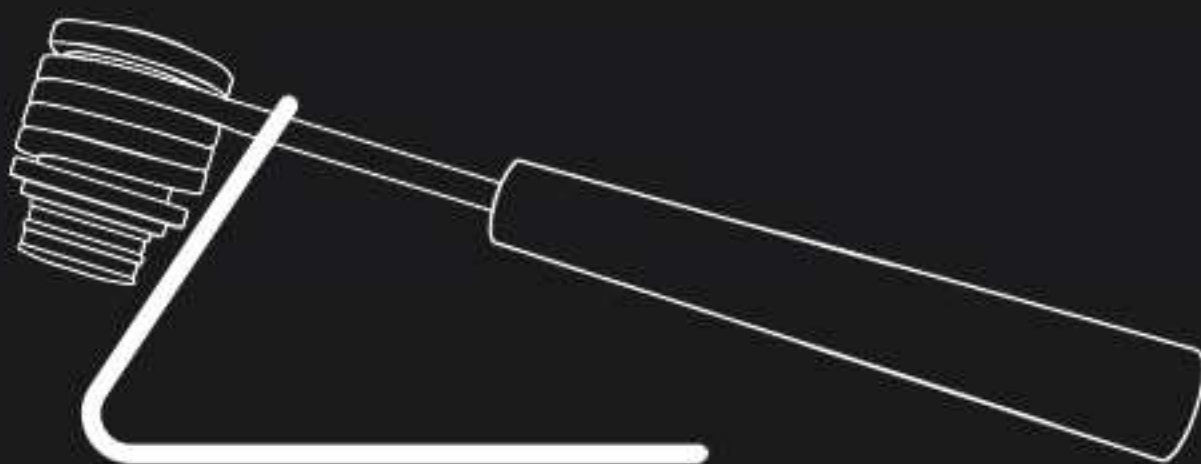

## POWER SUPPLY

Connect the power cable and the heating coil handle to the controller. Plug the power cable into a suitable power source.

## PREPARATION

Place the Brennix LiftOff in the stand. Make sure that a suitable surface is used and that the stand does not wobble. Also pay attention to loose hanging cables and the secure positioning of the controller.

Always use the Brennix LiftOff stand during the heating and cooling process and never place the heating handle on other surfaces to avoid contaminating the heating coil and the risk of fire.

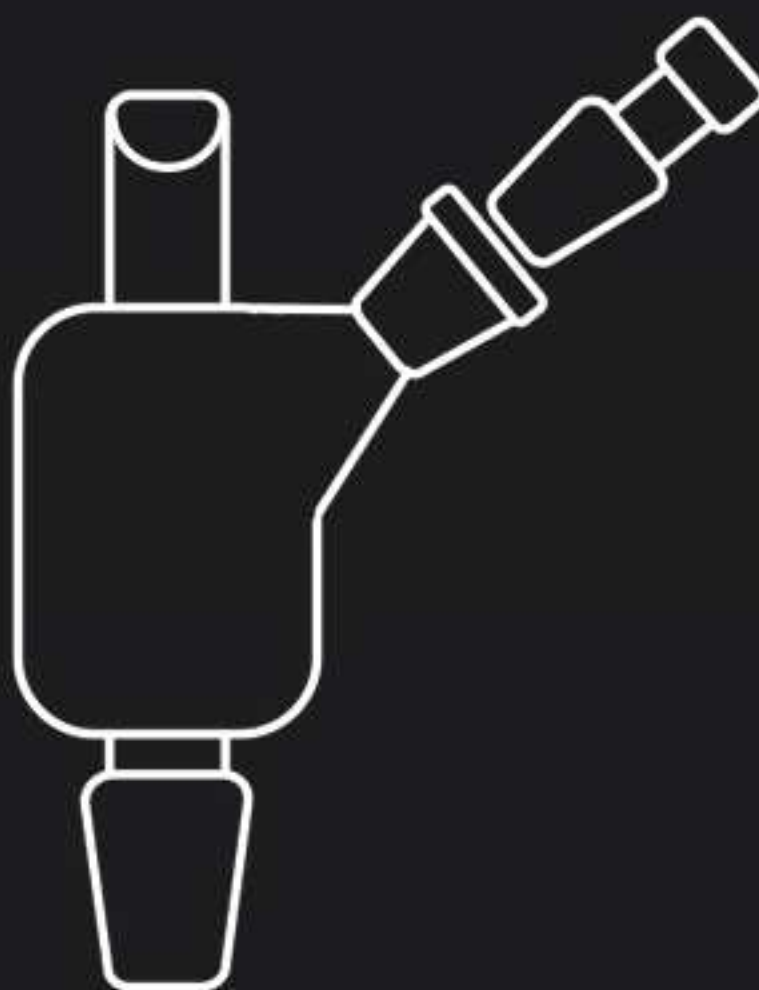

## YOUR CHOICE

Choose one of the glass or titanium Brennix LiftOff herb bowls and connect it to a cooling filter with a 14.4mm/18.8mm cut of your choice.

### OVERVIEW OF THE HERB BOWLS

titanium herb bowl

glass micro herb bowl

glass herb bowl

## TITANIUM HERB BOWL

The titanium herb bowl can be used on 14.4mm and 18.8mm grinds thanks to the Brennix adapter. The 14.4mm adapter is screwed onto the 18.8mm herb bowl and the wooden handle is attached. The wooden handle should always be removed for cleaning. Due to the titanium, the herb bowl is extremely robust and perfect for on the go.

## GLASS MICRO HERB BOWL

The micro herb bowl is perfect for small doses of herbs without compromising on vapor density. With the pass-through adapter, you can also get the last bit of vapor out of the water filter.

## GLASS HERB BOWL

The glass herb bowl fits on 14.4mm cuts and is perfect for all glass fans, watch the herbs vaporize and free your water filter from any leftover vapor using the pass-through adapter.

# FILLING THE HERB CHAMBER

## TITANIUM & GLASS HERB BOWL

Use the included herb scoop to fill the glass & titanium herb bowl. The filling quantity can be adjusted to your personal preferences. Note that the screen should always be covered with herbs when vaporizing to ensure good extraction. The herbs on top should not touch the edges of the titanium heating element.

## MICRO GLASS HERB BOWL

Fill a small amount of herbs into the rounded screen of the micro glass herb bowl. Make sure that the herbs are not overfilled. The herbs should not be above the edge of the herb bowl.

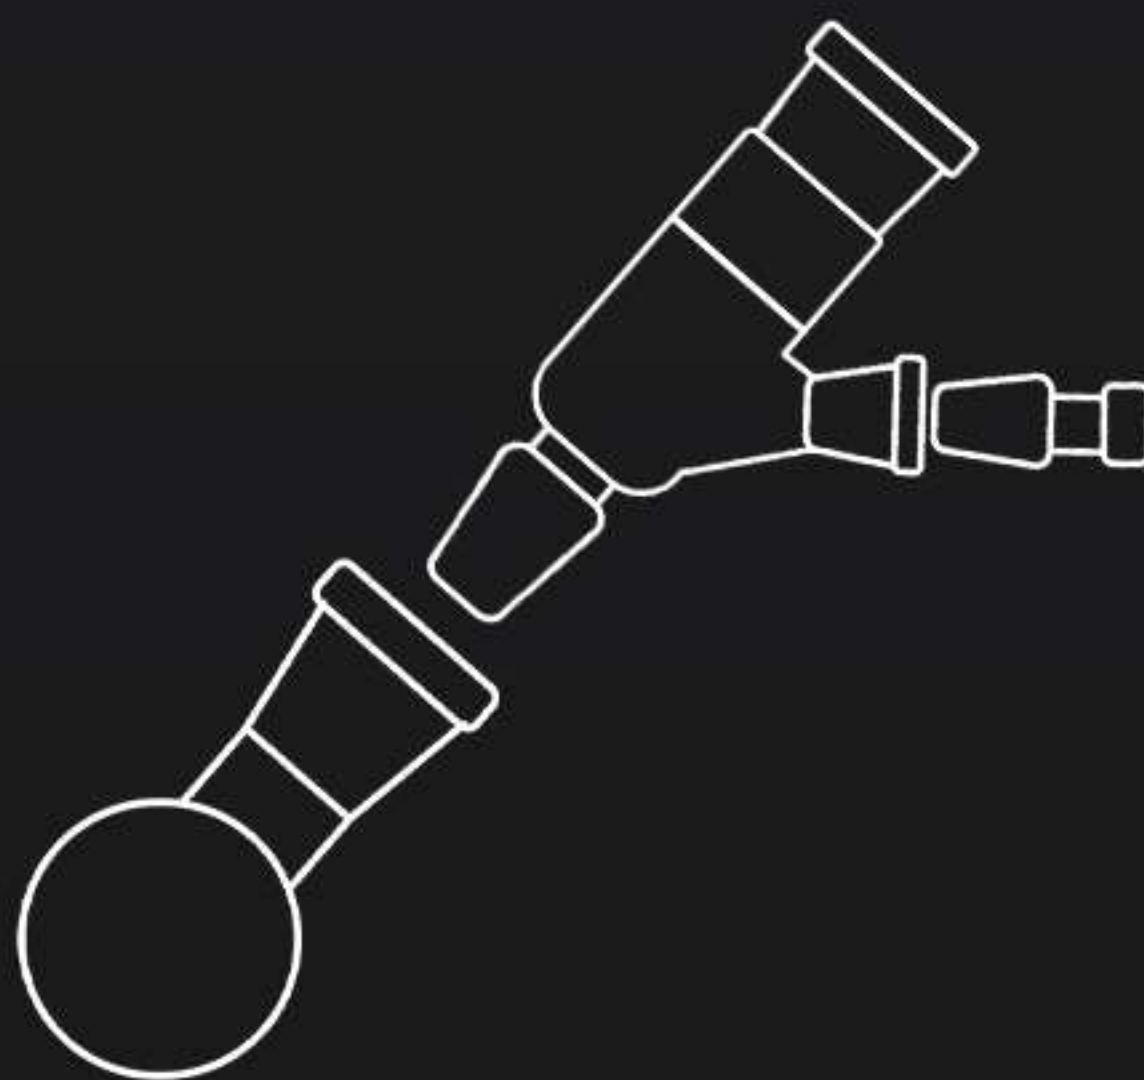

---

## FILTER CONNECTION

### WATER BUBBLER/PIPE

Once the herb chamber of the herb bowl has been filled with herbs, place the herb bowl in a water filter or pipe.

The titanium herb bowl fits on 18.8mm cuts. With the Brennix titanium adapter it also fits on 14.4mm cuts. The glass herb bowls only fit on 14.4mm cuts.

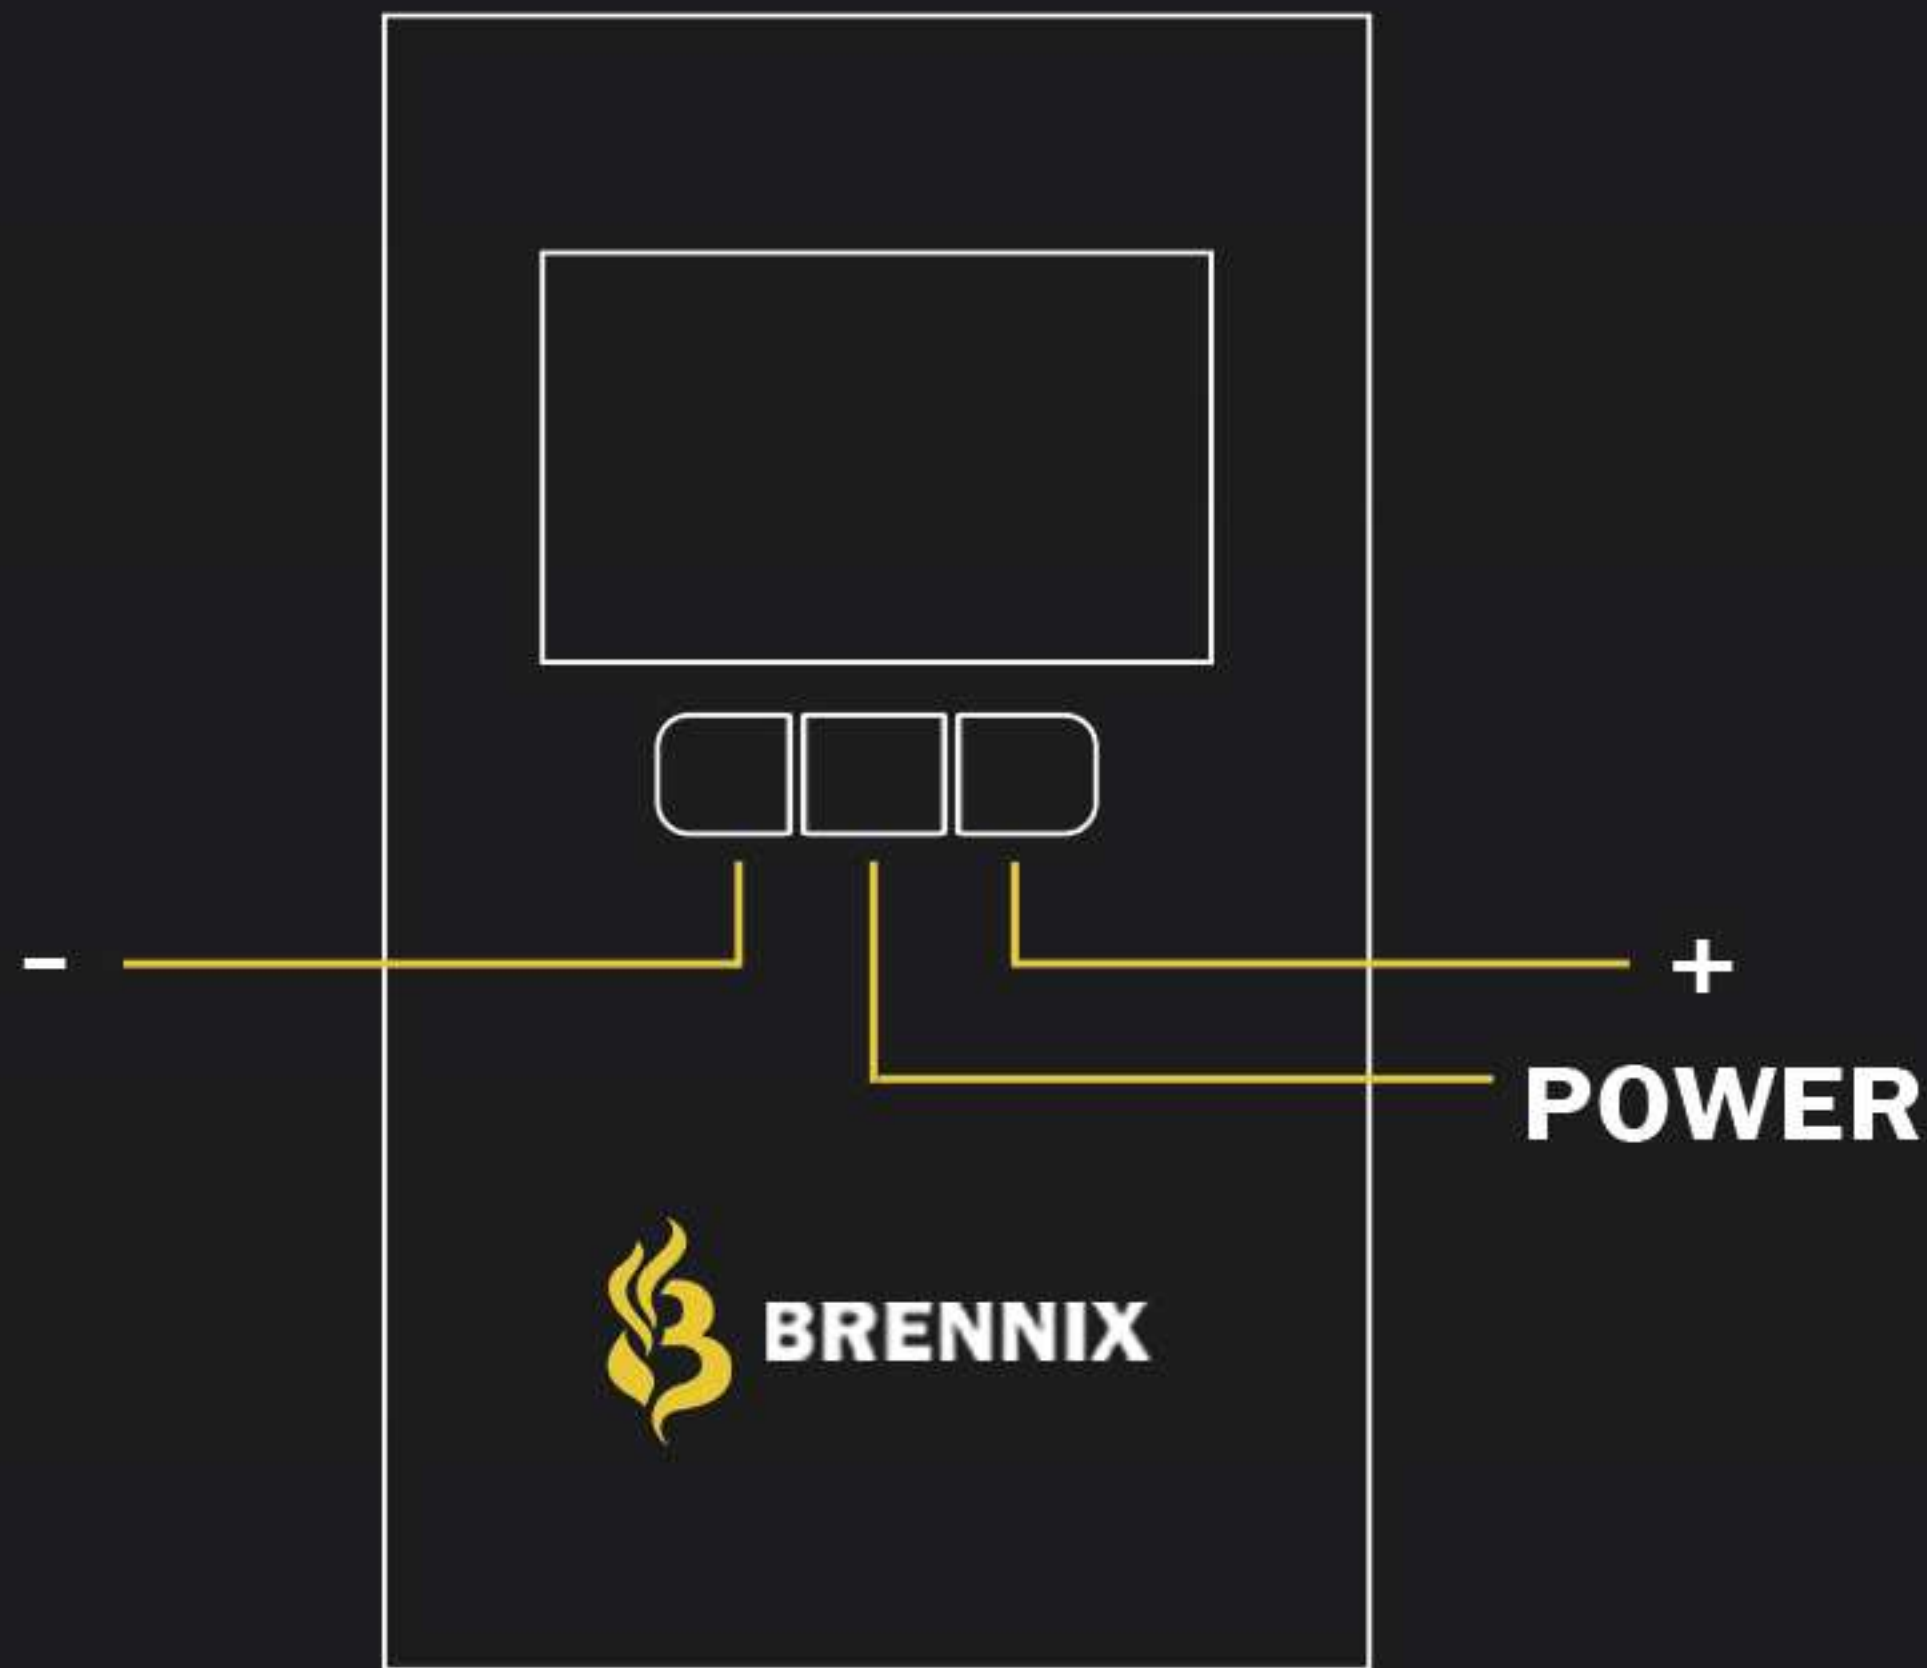

**Ensure that the preferred cooling system is securely positioned.  
Systems that are too small could tip over and cause damage and injury!**

## CONTROLLER

To switch the controller on and off, press and hold the POWER button for 5 seconds. The controller now first displays the selected temperature. After 3 seconds, the heating element starts to heat up to the selected temperature and the temperature can be adjusted using the “+” and “-” buttons.

## CELSIUS / FAHRENHEIT

Switch between Celsius and Fahrenheit by pressing and holding the “+” button for 3 seconds. The temperature unit can only be changed when the controller is in standby mode. To do this, the controller must be connected to the power supply.

## TIMER

The timer is a safety function of the Brennix LiftOff. The timer ends the heating cycle automatically after a variable time. To change the timer time, press the POWER button five times to enter the timer menu and select between 1 - 5 hours operating time with the “+” and “-” buttons.

## TEMPERATURE

The timer is a safety function of the Brennix LiftOff. The timer ends the heating cycle automatically after a variable time. To change the timer time, press the POWER button five times to enter the timer menu and select between 1 - 5 hours operating time with the “+” and “-” buttons.

## LIFTOFF

Once the desired temperature has been selected and the heating coil has reached the temperature, place the heating element on your chosen herb bowl. Due to the quick heating time, you can start inhaling straight away.

For larger amounts in the titanium & glass herb bowl, stir several times with the scoop during the heating cycle to ensure even extraction.

Do not leave the heating element on the herb bowl for too long. This could cause the herbs to burn.

## CLEANING

**Only clean the parts of the Brennix LiftOff when they have cooled down completely!**

Brush the filling chamber after each use with the cleaning brush included in the scope of delivery and clean the herb bowl and the filling chamber sieve regularly with isopropyl alcohol.

### TITANIUM HERB BOWL

Unscrew the wooden handle from the herb bowl and remove the filling chamber screen. Soak the herb bowl and the screen in isopropyl alcohol for approx. 60 minutes or use an isopropyl alcohol wipe for cleaning. Then rinse the parts with warm water. Only use a wet wipe to clean the wooden handle!

### GLASS HERB BOWL

Remove the filling chamber screen from the glass herb bowl. Place the herb bowl and the screen in isopropyl alcohol for approx. 60 minutes or use an isopropyl alcohol wipe for cleaning. Then rinse the parts with warm water.

---

## HEATING ELEMENT & HEATING COIL

**Only disassemble the parts of the Brennix LiftOff if they are fully cooled down.**

The heating element can be removed from the heating coil and the heating element unscrewed to access the Gem-Cut Rubies inside. Take care to hold the heating element upright so that no rubies fall down, and be careful not to touch the heating coil, as otherwise dirt and oil from your hands could get onto the coil.

Unscrew the lid from the Brennix LiftOff heating element. The heating coil can now be carefully removed from the heating element. The Gem-Cut Rubies are located inside.

After disassembling the heating element or touching the heating coil, the heating element should always be heated to a high temperature (300 °C) to burn off any residue.

# SAFETY INFORMATION

## **Burn/Fire Hazard!**

The hot coil and hot herb heads can cause burns!

Allow the device to cool completely before touching, cleaning, disassembling, or storing it. Use the device with great caution while it is hot!

Always unplug the device from the power outlet before cleaning or disassembling it. Do not immerse the controller, power cord, or plug in water or other liquids.

Improper handling, faulty electrical installation, or excessive voltage can lead to electric shock or short circuits. Do not operate the device if it is damaged. Always disconnect the device from power once you are done using it.

Do not leave the device unattended while it is connected to the power supply or still hot. Always place the heating element in the designated stand and on a firm, stable surface to prevent it from falling.

The device should always be used and stored out of the reach of children and pets.

If any damage to the product is detected, disconnect the device from the power supply and contact our customer service!

Modifying or painting the device can cause permanent damage. The controller and electronic parts of the device should never be disassembled.

The device should not be used by minors, pregnant or nursing women, or individuals with medical conditions!

Ensure that the device is used in a well-ventilated area to avoid the buildup of heat or vapors, which could pose a fire hazard or health risk. Always maintain proper ventilation during use to ensure safe operation.

Misuse can result in damage to the device.

**NOT FOR USE WITH E-LIQUIDS, TOBACCO OR TOBACCO PRODUCTS**

## WARRANTY

The Brennix LiftOff comes with a 2-year limited warranty, which is provided by VDN Berlin GmbH | [verdampftnochmal.de](http://verdampftnochmal.de)
